

1, Var

1, User - id
2, username
3, first - name
4, last - name
5, email - address
6, password - hash
7, canEdit
8, current User
9, Product - id
10, Unit - price
11, StartTime
12, ~~end~~Time
13, countingTime
14, errorMessage
15, statusCode
16, statusBar
17, navButton
18, pendingOrders
19, pageSize
20, currentPage
21, searchResults
22, userList
23, upperCase
24, lower - case
25, middleClass
26, sortOrder
27, retryCount
28, rowCount
29, columnCount
30, final - update
31, log - level
32, Primary - key
33, prime - number
34, page - number
35, aptitude - class

~~36, errorQueue~~

36, errorQueue

37, timeUp

38, timeStart

39, forLoop

40, whileLoop

41, api - key

42, payment - status

43, current - order

44, Order - date

45, dark - theme

46, light Theme

47, payment Method

48, expireDate

2, Let

- 1, current Input
- 2, Selected Role
- 3, temporary Token
- 4, current Step
- 5, active - users
- 6, activate Id
- 7, end Test
- 8, task - Submission
- 9, exam Result
- 10, format - Date
- 11, refresh - page
- 12, id - selected
- 13, pending tasks
- 14, finishing Tasks
- 15, starting Tasks
- 16, tag Name
- 17, update - date
- 18, update - month
- 19, update - year
- 20, bike Ride
- 21, time Travel
- 22, anime Series
- 23, live - script
- 24, online - class
- 25, offline Class
- 26, Camel Case
- 27, game Over
- 28, start Game
- 29, live Example
- 30, friend Ship
- 31, note Book
- 32, note pad
- 33, hand Writing
- 34, blue pen
- 35, black - pen
- 36, task - time

- 37, modern - class
- 38, modern - stack
- 39, full - stack
- 40, back End
- 41, front End
- 42, java Class
- 43, funny Content
- 44, face Book
- 45, variable Name
- 46, black Colour
- 47, raw Water
- 48, blue Sea

3, const

- 1, emailBook
- 2, user profile
- 3, red-line
- 4, mobile-phone
- 5, fourth-number
- 6, javaCodes
- 7, pythonCodes
- 8, javaScript
- 9, localhost
- 10, Script-editor
- 11, Submit Button
- 12, navBar
- 13, keypoints
- 14, mouse-click
- 15, left-click
- 16, right-click
- 17, rightSide
- 18, left-side
- 19, frontSide
- 20, backSide
- 21, whitePage
- 22, black-paper
- 23, video-Editing
- 24, total-calculate
- 25, phone-number
- 26, landLine
- 27, tenNumbers
- 28, localStorage
- 29, keyBoard
- 30, search-bar
- 31, upper-heading
- 32, move-aside

33, school Bags

- 34, right-hand
- 35, left-hand
- 36, penCap
- 37, capCut
- 38, enter-password
- 39, enter-name
- 40, sky-blue
- 41, skyDive
- 42, seaSwim
- 43, black-shirt
- 44, apple-tree
- 45, weekDays
- 46, mothDays
- 47, Secret-key
- 48, statusCodes

1, What is java script?

=> Java script is a programming language used to create dynamic and interactive web pages.

File -> Folder -> code -> javascript File -> Browser

-> Java script Engine -> Execution

2, What is variables?

=> A variable is a named storage location used to store a value.

Example:

```
var username = "React";
```

Here:

var -> keyword

username -> Variable Name

= -> Assignment Operator

"React" -> value

3, What is variable declaration?

Declaration means creating a variable without assigning a value.

Example:

```
var username;
```

Here

var -> keyword

username -> Variable Name

This is called variable declaration.

4, What is initialization?

=> Initialization means assigning an initial value to variable.

Example:

```
var username = "React";
```

Here:

var username -> Declaration

= "React" -> Initialization / Assignment

5, What is an assignment operator?

⇒ The Assignment operator is : =
⇒ it is used to assign a value to a variable

Example:

```
var username;  
username = "React"
```

6, What are var, let and const?

VAR:

⇒ var is the traditional JavaScript variable declaration keyword:

Example:

```
var username = "React";
```

LET:

⇒ let was introduced in ES6

⇒ ES6 means ECMAScript 2015.

Example:

```
let city = "chennai";
```

CONST:

⇒ Const was also introduced in ES6.

⇒ const is used when the variable binding should not be reassigned.

Example:

```
const course = "JavaScript";
```

7, What is different between var, let, const

Feature	var	let	const
Scope	Function-Scope	Block-Scope (??)	Block-Scope
Reassignment	Allowed	Allowed	Not allowed
Re-declaration	Allowed	Not allowed	Not allowed

8. What is ES6?

⇒ ES6 stands for ECMAScript 2015.

⇒ ES6 introduced many modern JavaScript features.

⇒ Important Variable declarations:

var
let
const

9. What is a JavaScript Engine?

⇒ V8 is a Google's JavaScript Engine.

⇒ Chrome uses the V8 Engine to execute JavaScript.

Basic process:

JavaScript code → V8 Engine → Execution → Result

10. What is V8?

⇒ V8 is an open-source high performance JavaScript and WebAssembly engine developed by Google in C++.
